Product designer who owns the whole product, not just the screens. I turn AI into consumer products anyone can use, and my psychology training shapes how I work: I find where people hesitate, prove why, then design that step out. 5 years shipping mobile apps from 0 to 1 across AI, relationships and well-being.

Experience

NAVER Corporation | Product Manager Intern

JUL 2026 – AUG 2026 · SEOUL

Planned AI-powered features for NAVER Membership on a platform reaching **50M daily visitors**, from user pain points to concepts and prototypes

Designed an AI calling agent end to end, from a survey (n=37) and a 100-store field audit to journey maps and an interactive prototype

Designed live-call controls that let users watch the AI and step in at any moment, cutting booking from **11 to 5 steps**

Won executive approval across three review rounds; **patent** application in progress

Azure Mir, LLC | Co-Founder · Product Designer & PM

APR 2019 – SEP 2025 · LYNNWOOD, WA

Led the design direction for 6 consumer mobile apps, from wireframes to high-fidelity interactions

Designed Maroo AI's three-tap photoshoot flow and a ~1,000-template library, leading to an **acquisition at launch**

Launched and grew LuvDiary, a relationship app with built-in journaling, for 3 years to **20K+ DAU and 52% D30 retention**

Grew an organic social audience to **28K+ followers** with zero ad spend through relationship-focused storytelling for international and Asian markets

Redesigned Wonderful, a self-esteem journaling app, around how it should feel, raising **3-month retention from 14% to 39%**

Collaborated with engineers to scope features, define edge cases and keep design intent intact through development

Botlab | Product Designer

AUG 2025 – MAY 2026 · SEOUL

Designed a B2B commerce web platform for a ~$7M marketing company, from information architecture to high-fidelity UI

Designed a prayer app for a San Francisco church, supporting members across its global branches

Turned complex genetic test results into clear, readable report screens for a genetic testing company

Education

Korea University

2025 – PRESENT

M.A., Clinical & Counseling Psychology · GPA 3.9/4.0

- **Thesis:** how attachment styles shape relationships with human versus AI companions
- **Positive Clinical Psychology Lab:** designed a positive-psychology AI chatbot and user-tested a metaverse counseling service
- **KU Smile Lab:** AI emotion recognition research for a Samsung-affiliated project, building a Korean emotional speech dataset
- **INSIDERS startup society:** Head of PR; won 1st place with an AI short-form drama service proposal

University of Washington

2020 – 2023

B.A., Psychology · GPA 3.72/4.0

- Dean's List for consecutive quarters
